

Challenging Cultural Convention

How can Robotics be a catalyst, not a threat to culture?

Character (ie. Project) Types:

Automating tasks

Productivity improvements

Capacity release

Customer journey

Digital transformation

Functional transformation

Culture change

Current RPA pressures

Negative media around job security

E2E automation targets > 35%

The need to quickly 'cover over the cracks'

START!

AUTOMATED WASTE

Robotic Process Automation alone boosts speed, but also increases the defect rate
