A globally leading advisory business helping organisations navigate the energy transition

Our Energy and Resources offering:

Power and Renewables

Delivering innovative energy services to market - We help clients tackle their biggest challenges, from defining ambitious **decarbonisation strategies** to **commercial design** and execution, across a range of low carbon **energy asset solutions**, renewable **procurement strategies** and **clean molecule technologies**.

Trading companies rely on our help to adapt to a changing world. Where managing portfolios in volatile markets are key to delivering the energy transition. Where implementing **digital solutions** deliver best in class **portfolio insights**.

Commodities and Energy Trading

Energy Retail

Our clients are at the sharp end of unprecedented market volatility and uncertainty and seek our help in tackling their biggest challenges such as **shaping and navigating market reform**, **transforming customer operations** or helping develop and deliver their **net zero strategy**.

Our expert teams work with all major actors shaping, delivering, or impacted by the **transformation of energy networks**, providing a breadth of services from strategy and policy through to business change and **technology solutions** to tackle today's critical network challenges, such as **resilience**.

Energy Networks

Water

We are proud water geeks with a passion for helping water companies **prepare for the future**. We're not about simply setting out a strategy or applying theoretical models; we take the time to get to know our clients and partner with them to deliver **positive business outcomes**.

Our energy market experts support clients across the globe with their investment decisions and emerging commercial opportunities

Delivering services to our clients in over 60 markets across the globe

Data and AI

We help you understand the potential of data and AI for your organisation. Read our industry insights:

Green Data: a vision for sustainable data centres in Ireland
